3. In each preliminary round, each team will be assigned to a table and will be given **SIX** Sudoku puzzles on papers to solve within **THREE** hours. Puzzles are of different degrees of difficulty. Participants can choose which puzzles to attempt first. There is no restriction on the number of persons working on a puzzle.
4. The teams will be judged on accuracy and speed. Organizers will determine the first three teams which complete all the six puzzles correctly within the shortest time. For example, in a preliminary round, first three teams of a category to solve all six puzzles within the shortest time will get into the final. If less than three teams solve all puzzles within three hours, the judges will count the number of completed cells. First three teams with the most number of correct cells will go on to the finals.
